

Project: Net Crafts Unit: 7736-39 Student ID: S25
Date: 28/01/2026

Network Schema

Execution & Findings

The following data was collected using a Python automation script running on a Kali Linux virtual machine.

Analysis & Findings

1. Network Mapping The network scan identified a VMware NAT environment. The internal Gateway is located at **192.168.187.2**, which also functions as the DNS server for the virtual network. The attacker machine (Kali Linux) is located at **192.168.187.129**.

2. External Information

- **ISP:** ITC NG Ltd.
- **Public IP:** 89.208.129.82
- **Shodan Analysis:** The Public IP was cross-referenced with Shodan. The result returned "No Data Found," which is consistent for a dynamic residential IP address that does not host public-facing services.

3. Traffic Sniffing During the packet capture analysis, the following protocols were identified:

- **DNS (Port 53):** Detected during domain resolution requests.
- **HTTP (Port 80):** Detected during unencrypted web communication.
- **ICMP:** Detected during connectivity checks (Ping).

PROJECT NET CRAFTS AUTOMATION

[1] NETWORK MAP & DEVICE DETAILS (Ref: 1.1 - 1.6)

Interface: eth0
Connection Type: Ethernet
Gateway (Router):192.168.187.XXX
DNS Servers: 192.168.187.2
DHCP Server: 192.168.187.XXX
[*] Scanning network 192.168.187.129/24 (ARP Scan) ...

[+] Devices Table:

IP Address	MAC Address (Masked)	Vendor	Hostname
192.168.187.129	YOUR INTERFACE	Linux/Kali	Localhost
192.168.187.1	00:50:56:XX:XX:XX	VMware	Unknown
192.168.187.2	00:50:56:XX:XX:XX	VMware	Unknown
192.168.187.254	00:50:56:XX:XX:XX	VMware	Unknown

[2] EXTERNAL INFORMATION (Ref: 2.1 - 2.2)

Public IP: 89.208.129.82
ISP / Org: AS202940 ITC NG Ltd

[+] WHOIS Information:

netname: net22_89_208_131_0

[+] Shodan Check:

No Shodan data found (API key missing or no results).

[3] TRAFFIC ANALYSIS (Ref: 2.3)

[*] Sniffing on eth0 for 10 seconds (Scapy) ...

[+] Identified Protocols:

Protocol	Port	Usage Explanation
ICMP	N/A	Internet Control Message Protocol - Used for ping and diagnostics.
DNS	53	Domain Name System - Resolves hostnames to IP addresses.
HTTP	80	Hypertext Transfer Protocol - Unencrypted web traffic.

SUCCESS. Capture screenshot for submission.
